

## INTERNSHIP/CO-OP PROGRAM

LG Energy Solution Michigan, Inc. develops and manufactures large lithium ion polymer batteries and packs for electric vehicles (EV). An internship/co-op with LG Energy Solution Michigan is an excellent opportunity to apply your academic knowledge with real-world experience.

### AS PART OF OUR INTERNSHIP/CO-OP PROGRAM, YOU WILL:

- ✔ Be a fully contributing member of the team
- ✔ Gain valuable industry experience
- ✔ Be mentored by experienced professionals in our engineering and battery manufacturing departments
- ✔ Work in a comfortable environment with a culture of fun
- ✔ Gain real-world experience and problem solving skills
- ✔ Learn about facets of the battery production process
- ✔ Complete meaningful assignments and make the classroom connection
- ✔ Experience hands-on technical product interaction

**Successful candidates** will have completed 4+ semesters in an ABET Accredited Engineering Program with a minimum GPA of 3.0. Previous internship or co-op experience is preferred. Strong problem-solving, critical thinking, and analytical skills are required. We are looking for students with excellent communication skills and the ability to be flexible and adapt to new tasks and projects.

### WHAT OUR INTERNSHIP EXPERIENCE OFFERS

- Competitive Pay
- Hands-On, Real-World Projects
- Opportunities to Learn About the Growing EV Industry

### COME JOIN THE LEADER IN ADVANCED EV BATTERIES!
